To Mayor and Council
City of Victoria

Re: 1739 Hollywood Cres.

The proponent wishes to enclose a section of their balcony to create a 150 sq ft solarium. The increase in the overall square footage beyond what is currently permitted under the zoning is what has made this a re-zoning application.

Neighbours Comments

Would support the application as long as the only thing to change from this re-zoning is a slight increase in the overall permitted total square feet.

Thought views might be obstructed, but can see by the pictures that none will.

Committee Comments

Unanimously supported by the individual committee members.
