To the Residents and Businesses of Meares Street

Dear Sir/Madam:

**Re: Meares Street - Infrastructure upgrades are coming to your street**

The City of Victoria will be repaving Meares Street near Cook Street to the east end and the lane way from Meares Street to Rockland Avenue as part of the 2017 Local Streets Rehabilitation program. This project meets the goals of long term pavement management, as well as, pedestrian safety and accessibility.

The work is being coordinated with the development activity at 1033 Cook Street. Concrete repairs and paving will only occur east of the development project at this time.

Construction is planned to start in latter part of July.

Improvements include:

- **New pavement structure and driving surface:** Reconstruction of the asphalt surface will improve pavement performance and longevity.
- **Improved pedestrian environment:** Sections of sidewalk restoration on both the north and south side of Meares Street.

We appreciate any questions or input you may have. Please contact me by phone at 250-361-0569 or by email [bnorman@victoria.ca](mailto:bnorman@victoria.ca) to discuss any concerns on the project.

A construction letter with more details will be circulated closer to the start date.

Thank you,

A handwritten signature in black ink that reads "Barry Norman".
