

November 4, 2008

Mayor and Council
City of Victoria

950 Humboldt

The proponent for this project appears to be seeking several variances. It is hard from the information provided to determine exactly the percentage or numbers in relation to what is currently permitted. The proponent has not requested to meet with the Fairfield Planning and Zoning Committee and under current regulations is not required, therefore I am unable to comment on what is being requested or proposed at this time.

However, in my role as President of the Fairfield Community Association I do know the association has been supportive of this project and has been working with the proponents to help guide and facilitate the integration of this project into the neighbourhood.

Wayne Hollohan
On behalf of the Fairfield Community Association
